

NETWORKING SOLUTIONS

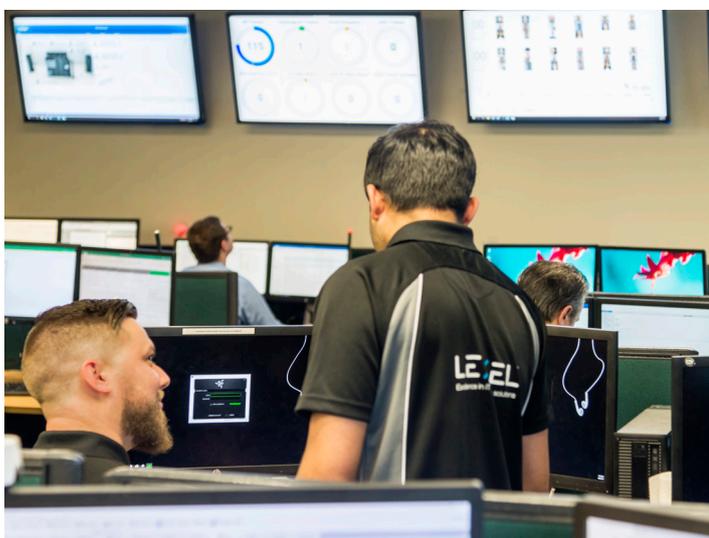

ASSESSMENT, DESIGN AND MANAGEMENT

Lexel delivers specialist advice, leadership, and expertise to ensure that your network remains agile and aligned with your business needs.

As companies introduce disruptive and emerging technologies, network infrastructure has become a critical component for the successful delivery and support of these applications.

Customers trust us to deliver next generation networks. At Lexel, we ensure customers get the right advice from the start, every time, delivering and supporting innovative solutions - in a scalable cost effective manner.

Lexel's strength is further demonstrated through the breadth of globally recognised partner certifications that customers can rely on. With deep investment in our technical skills and expertise, Lexel provides customers access to the best in the business.

SERVICES AND SOLUTIONS

Network Optimisation Assessment. Gain visibility of your network performance. Lexel's networking experts can provide you with a range of network performance statistics and analysis, along with cost effective recommendations.

Network Management. Lexel can deliver managed network services for LANs, WANs and remote access solutions. These can be delivered across a variety of platforms including wired, wireless and converged networks.

Network Architecture and Design. Our experienced team can provide one off or ongoing engagements; assisting your business with clarity of your networking vision, alignment with the broader business strategy.

Wireless. No more cables! Lexel can deliver a reliable wireless network at a fraction of the cost of conventional alternatives.

Gigabit Passive Optical Network (GPON). A green networking solution at a lower cost than traditional Ethernet. The Lexel team have proven experience in designing and deploying GPON solutions.

Managed Services. Allow Lexel to take all the responsibility for your network.

Support. Experienced New Zealand based support engineers can troubleshoot and solve network problems quickly, minimising expensive down-time for your business.
